

INSTRUCTIONS FOR POSTER AUTHORS

The Posters (electronic communications) will be available throughout the Congress on 28-29-30 April 2025 on 55-inch multi-touch monitors, **vertically** oriented located in the poster area.

In each screen will be possible to:

- Search, simply by typing on the screen, the contribution of interest through search keys, such as author's surname, ID
- View the contribution of interest
- Zoom in to see details

Each author should prepare the contribution by exporting the file to a single page in format. **Pdf**.

Please don't forget to rename the file with your ID number and first and last name of the author.

Size should be 84.1x118.9 (vertical mode)

Recommended maximum size: 500 MB.

Consider that the file will be opened by a browser which adapts the display scale to the screen. The format will therefore be more important than the absolute size.

Once you have prepared the **pdf file** of your poster, zoom in on the details that interest you to be visible. If you can display them correctly on your device, they will also be displayed correctly on the POSTER system

N.B:

Authors should send the material to eleonora.cavallina@lcfcongress.com by April 10th.

The POSTER may include text, figures, images but not video.
